Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The concentration of the *Agrobacterium* suspension was 10<sup>6</sup> cells/ml (A), 10<sup>7</sup> cells/ml (B), 10<sup>8</sup> cells/ml (C), 10<sup>9</sup> cells/ml (D), and 10<sup>10</sup> cells/ml (E). The transformation efficiency was determined by the number of transformants per 10<sup>6</sup> cells of the *Agrobacterium* suspension. The data are the mean ± SD of three independent experiments.
